

90% of our children are low literacy students.

80% of our children raise their literacy scores from low to average and are ready for kindergarten!

Children who experience educational gaps often fall through the cracks and are likely to:

- Start kindergarten below grade level
- Drop-out of high school if not reading at grade level by 3rd grade
- Have narrowed life choices: If not reading at the 4th grade level, one can fall into the 70% bracket who depends on social services; homelessness, incarceration, etc.

It doesn't have to be this way!

Mahalo Nui Loa!

Your support can help many families receive the education their keiki need to thrive in the school environment.

It's a privilege to offer this amazing free program to families in need, but we simply cannot do it without you!

With your support, we can reach more families every year!

See what's going on at our program

Preventing educational gaps and the serious issues they create

www.ImpactChangeHawaii.com

✓ ACADEMIC LITERACY

We focus on and select books specifically for increasing our student's academic language.

✓ CUTTING EDGE RESEARCH

Our curriculum is based on the most current Science of Reading information for a child's literacy development.

✓ PARENT PARTICIPATION

We believe parents are the first-line educators. We focus on empowering parents by giving them tools they need to participate in their child's education.

35-40% of our kindergarteners have little or no preschool experience. School funds cannot be used for children who are not officially our students. Building Blocks Hawaii's tremendous success is closing this gap! I wholeheartedly support their efforts to network community resources to help close this learning gap!

Corinne Joze

**Principal
Kipapa Elementary School**

Incredible Parent Testimonies!

"BBH helped me as a parent to prepare my child for school. The things she learned amazes me and my husband everyday."

"Since coming to the program, my child has been able to say things she couldn't say before and her vocal communication has enhanced!"
